

Name: Key

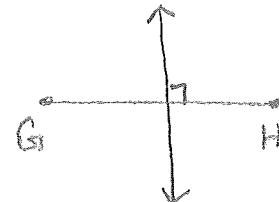

Hour: \_\_\_\_\_

Homework: Line Segments and Angles  
The Basics**Directions:** Illustrate the following.

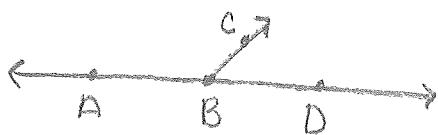

1. X is the midpoint of
- $\overline{AB}$

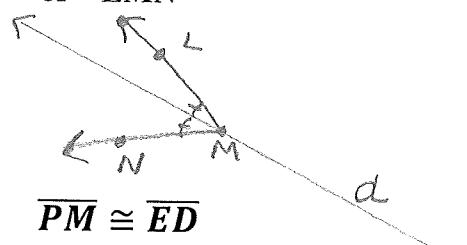

- 2.
- $\overrightarrow{AB}$
- is a
- $\perp$
- bisector of
- $\overline{GH}$

- 3.
- $\angle ABC$
- and
- $\angle CBD$
- are linear pairs

4. Line d is an angle bisector of
- $\angle LMN$

- 5.
- $\angle WXY \cong \angle JKM$

- 6.
- $\overline{PM} \cong \overline{ED}$

**Directions:** Refer to the figure.

7. Name a line that contains point P.

 $n, \overleftrightarrow{PS}, \overleftrightarrow{RS}, \overleftrightarrow{PR}$ 

8. Name the plane containing lines n and m.

 $F$ 

9. Name the intersection of lines n and m.

Point R

10. Name a point not contained in line l, m, or n.

W

11. What is another name for line n?

 $\overleftrightarrow{PS}, \overleftrightarrow{RS}, \overleftrightarrow{PR}$  order doesn't matter

12. Does line l intersect line m or line n? Explain.

Yes, it will eventually. It is not shown in this picture but the lines go on forever. None of the lines are parallel which means they will intersect.
