

## 3.1½ POWERS OF TEN & THE ZERO EXPONENT RULE

Name: \_\_\_\_\_

Block \_\_\_\_\_

**Investigation:** Complete the following table for the **powers of ten**.

Power	Expanded Form	Standard Form	Number in Words
$10^9$			
$10^8$			
$10^7$			
$10^6$			
$10^5$			
$10^4$			
$10^3$			
$10^2$			
$10^1$			
$10^0$			

Have another look at the chart above, can you see the following patterns?

~ for powers of 10, the exponent = \_\_\_\_\_

~ dividing by \_\_\_\_\_ for each descending power

~ zero exponent = \_\_\_\_\_

We could make **similar tables** for any power with any base *not equal to zero*.

\*This means that we can write 1 for any power with exponent zero.

For example:

$$9^0 = \underline{\hspace{2cm}}$$

$$200^0 = \underline{\hspace{2cm}}$$

$$(-3)^0 = \underline{\hspace{2cm}}$$

$$K^0 = \underline{\hspace{2cm}}$$

$$(\text{flower})^0 = \underline{\hspace{2cm}}$$

$$(\text{any number that isn't } 0)^0 = \underline{\hspace{2cm}}$$

$$x^0 = 1$$

**"Zero Exponents"**

*Properties of Exponents*

## THE ZERO EXPONENT RULE:

*“any base number or any base variable (letter) raised to the zero exponent,  
is always equal to 1”*

...BUT the base cannot also be zero.

$$x^0 = 1, \quad x \neq 0$$

**Example #1:** Evaluate each expression

a)  $8^0$

b)  $(-8)^0$

c)  $-(-8)^0$

Evaluate the following:

1.  $6^0$

2.  $-(6)^0$

3.  $(-6)^0$

4.  $-6^0$

5.  $2^0 + 3^0$

6.  $2^0 - 3^0$

7.  $3^0 \times 4^0$

8.  $(2^0 + 3^0)^0$

ASSIGNMENT #2 Complete the Following Worksheet on “The Zero Power Rule”

## Applying the Exponent Rule for Zero Exponents

Evaluate the following powers. Show working out where you can!

$$1) n^0$$

$$2) (3x)^0$$

$$3) 5y^0$$

$$4) -8a^0$$

$$5) (a+b)^0$$

$$6) a^0 + b^0$$

$$7) 3x^0y$$

$$8) 10(mn)^0$$

$$9) (0.005w)^0abc$$

$$10) \left(\frac{1}{2b}\right)^0$$

$$11) -\left(\frac{1}{5}\right)^0$$

$$12) 2a^0 + (2a)^0 + 2^0a$$

$$13) (9x)^0 - 9x^0 - (-9x)^0$$

$$14) (m+2)^0 - m^0 - 2m^0$$

$$15) \frac{(t+v)^0}{t^0 + v^0}$$

$$19) (xy)^0 + x^0 - y^0 - x^0y^0$$

$$20) 5^0(3+z^0)$$

$$\begin{array}{l} 1) 1 \\ 2) 1 \\ 3) 5 \\ 4) -8 \\ 5) 1 \\ 6) 2 \\ 7) 3y \\ 8) 10 \\ 9) abc \\ 10) I \\ 11) -1 \\ 12) 3+a \\ 13) -9 \\ 14) -2 \\ 15) \frac{2}{1} \end{array}$$

Answers:  
19) 0  
20) 4  
13) -9  
14) -2  
15)  $\frac{2}{1}$   
1) 1  
2) 1  
3) 5  
4) -8  
5) 1  
6) 2  
7) 3y  
8) 10  
9) abc  
10) I  
11) -1  
12) 3+a
